PROFILE

In my journey as a **Full-Stack Developer**, I am dedicated to strengthening my problem solving skills by tackling real-world challenges, breaking down complex systems, and continuously improving through self learning and hands on practice. I actively develop modern web applications using **React** and **Next.js** for building responsive, user-friendly interfaces, combined with **Node.js**, **Express**, and **MongoDB** for creating scalable backend systems. I enjoy transforming ideas into interactive digital experiences and thrive on both frontend creativity and backend logic, while staying up to date with the latest technologies and best practices

EDUCATION

Computers and Data Science (AI)	2022 – present Alexandria, Egypt
Yathreb Private School	Alexandria, Egypt

LANGUAGES

Arabic ● ● ● ● ● English

SKILLS

Problem-Solving, Team Collaboration, Communication, Time Management, Critical Thinking, Leader Ship, Organizer, Python, Java, C++, HTML, SQL, next js, mongoDB, javaScript, TypeScript, nodeJS, nextAuth, Docker, Excel, Microsoft Office, Adobe premiere

COURSES

Machine Learning

Cloud Computing

Databases

Operations Research

Pattern Recognition

NLP

Route Academy

PROJECTS

Family Bakery Website [🔗](#)

Developed a responsive **Bakery Website** using **HTML** and **CSS**, creating a modern and visually appealing user interface to showcase products and bakery services. Implemented layout designs with CSS styling for typography, color schemes, and image galleries to enhance user engagement. The site includes a homepage, product sections, and visual elements to reflect branding and usability. This project improved my skills in **front-end web development, responsive design, UI/UX aesthetics, and web layout techniques**.

DevFolio [🔗](#)

Designed and developed **DevFolio**, a personal portfolio website, using **HTML, CSS, and JavaScript** to present and promote my professional profile, projects, skills, and contact information. The site features a clean, modern layout with visually engaging sections, interactive navigation, and responsive design to adapt across desktop and mobile screens.

Fokir Website [🔗](#)

Designed and developed a **personal portfolio website** named “Fokir” using **HTML, CSS**, and responsive layout techniques. The site showcases personal branding, projects, skills, and contact information in a clean, modern interface with visual consistency and intuitive navigation. Implemented responsive design to ensure the site renders well on desktops, tablets, and mobile devices, and included image assets, custom typography, and structured content presentation

Mealify Website [🔗](#)

Designed and developed **Mealify**, a responsive website for showcasing meals and menu offerings, using **HTML, CSS**, and layout design principles. The site features a modern and clean interface with organized sections for meals, images, and navigation to deliver an engaging user experience. This project sharpened my skills in **frontend web development, UI/UX design, and responsive layout techniques**, while providing a professional demonstration of creating visually appealing web pages.

product landing page website [🔗](#)

Designed and developed a **Product Landing Page website** using **HTML** and **CSS**, creating a sleek, responsive layout to showcase products and key value propositions. Integrated visual elements such as product images, icons, and typography to emphasize branding and user engagement. The page features clear calls-to-action, organized sections (features, benefits, contact), and consistency in design for a polished user experience

Weather website [🔗](#)

Developed a responsive **Weather Website** using **HTML, CSS**, and **JavaScript**, integrating real-time weather data fetched via public APIs. The site displays current weather conditions, forecasts, and visual elements such as icons and background transitions to reflect weather changes. I built features like **search by city, error handling** for invalid inputs, and dynamic UI updates to improve user experience

Smart-Login-System-Website [🔗](#)

Built a **Smart Login System** using **HTML, CSS, and JavaScript** to enhance standard authentication flows with improved user experience and security. The project comprises pages for **index, signup**, and a **home/dashboard**, and includes frontend logic for form validation, user data handling, and navigation.

Movies-API-Website

Developed a **Movies Web Application** using the **React framework**, integrating a **Movies API** to fetch and display real-time film data such as titles, genres, ratings, and descriptions. Implemented dynamic components for **searching, filtering, and sorting** movies, with responsive layouts and interactive UI elements for a smooth user experience. Utilized **React Hooks, state management, and API integration** (via Axios or Fetch) to handle asynchronous data flow efficiently.

Saraha App

Developed a backend application inspired by a **Saraha** anonymous messaging platform using **Node.js** and **Express.js**. Designed and implemented **RESTful APIs** to manage anonymous message exchange between users. Built server-side logic including routing, middleware, validation, and error handling to ensure secure and efficient operations. Focused on clean architecture and reliable data handling, with thorough **API** testing and debugging using **Postman**.

Event Management System

Built **EventX Studio**, a full-stack event management system using **React, Node.js, and MongoDB**, with distinct roles for **admins** and **users** to ensure secure and role-based functionality. The system includes features such as user authentication (JWT), event creation/editing/deletion, ticket type configuration, seat selection, booking with QR code generation, and dashboard-level insights (sales, engagement, attendee demographics). A modern UI/UX was implemented with React + Vite, styled using Tailwind CSS, with both dark/light theme support, responsive layout, and interactive frontend components.
