

Ammar Yasser Abdallah

FULL STACK DEVELOPER

Alexandria, Egypt · +20 100 046 3804 · ay109543@gmail.com · linkedin.com/in/ammam-yasser2003 · github.com/AmmarYasser72 · ammam-portfolio-red.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer specializing in building responsive, production-ready web applications with React.js, Next.js, TypeScript, Node.js, Express.js, and NestJS. Experienced designing REST APIs, secure authentication systems, and database-backed workflows using MongoDB and SQL, with real-time features powered by Socket.IO and containerized, deployment-ready builds with Docker. Skilled in end-to-end delivery — from responsive UI development and API integration to testing, performance optimization, and Git-based collaboration in Agile teams. Brings additional depth in Python-based AI integrations, extending traditional full-stack applications with intelligent, automation-driven features.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Vite

Backend: Node.js, Express.js, NestJS, REST API Design, Authentication & Authorization, WebSockets, Socket.IO

Databases: MongoDB, Mongoose, MySQL, SQL, Data Modeling

DevOps & Tools: Git, GitHub, Docker, Postman, Figma, Vercel, Agile/Scrum, Code Reviews

AI & Automation: Python, LLM Systems, RAG Chatbots, n8n, Custom GPTs, Open-Source AI Models

PROFESSIONAL EXPERIENCE

Coding Instructor

Feb 2025 – Mar 2026

O-Academy — Remote

- Taught full stack web development — React, Node.js, JavaScript, and REST APIs — to U.S.-based students through live, project-based coding sessions.
- Guided students end-to-end through building real web applications, translating frontend and backend concepts into hands-on, production-style implementation.
- Mentored learners on debugging, code quality, and clean development practices, strengthening their confidence and readiness for independent projects.
- Adapted curriculum and pacing across varied age groups and skill levels, sustaining engagement and driving measurable progress session over session.

Full Stack Developer Intern

Sep 2025 – Nov 2025

MAIM Digital Solutions — Alexandria, Egypt

- Developed responsive full-stack web applications using React.js, Node.js, Express.js, and MongoDB, owning features from database schema through to UI.
- Built reusable, accessible UI components and implemented pixel-accurate, responsive interfaces across devices and screen sizes.
- Integrated REST APIs end-to-end, partnering with backend engineers to ship complete features on schedule.
- Strengthened application quality through hands-on debugging, testing, and performance optimization.
- Collaborated in an Agile environment using Git/GitHub feature branches, pull requests, and peer code review to consistently deliver sprint commitments.

AI & Automation Engineer

Apr 2025 – Sep 2025

Armstrong — Alexandria, Egypt

- Built AI driven automation pipelines for the Digital Egypt Cubs Initiative (DECI), a national educational initiative under Egypt's Ministry of Communications and Information Technology (MCIT).
- Designed scalable content-generation workflows using n8n, custom GPTs, and open-source AI models, automating educational content production and reducing manual workload.

PROJECTS

MindGuard — AI-Powered Mental Health Monitoring Ecosystem

Graduation Project | 2025 – 2026

Tech: Next.js, TypeScript, Tailwind CSS, NestJS, MongoDB, Socket.IO, JWT, Flutter

- Engineered core web features for a multi-platform healthtech ecosystem, building patient and doctor workflows spanning authentication, analytics dashboards, mood tracking, appointment booking, and AI risk-monitoring.
- Implemented real-time chatbot functionality with Socket.IO streamed responses, persistent message history, and reconnection handling for stable frontend-backend communication.
- Built secure backend data-handling patterns — RBAC, DTO validation, bcrypt password hashing, OTP verification, and audit logging — to protect sensitive health data.

EventX Studio — Full-Stack Event Management Platform

Tech: React, Tailwind CSS, Node.js, JWT, REST APIs

- Built a full-stack event management platform supporting admin and user roles, JWT authentication, event CRUD operations, ticketing, seat selection, QR-code generation, and booking analytics dashboards.
- Designed a responsive React and Tailwind CSS interface with reusable components and dark/light theme support, ensuring a consistent experience across devices.

Exclusive — Full-Stack E-Commerce Platform

Tech: Next.js, Tailwind CSS, Node.js, MongoDB, JWT, REST APIs

- Developed a full-stack e-commerce platform covering product catalog management, shopping cart, wishlist, and order workflows, backed by secure JWT authentication.
- Designed REST APIs and MongoDB data models, and built reusable Next.js/Tailwind CSS frontend components for a consistent, responsive shopping experience.

Saraha App — Backend API Project

Tech: Node.js, Express.js, REST APIs

- Designed RESTful APIs for an anonymous messaging platform, implementing structured routing, middleware, request validation, and centralized error handling.

Movies API Website — Frontend Project

Tech: React, Axios, REST APIs

- Built a responsive movie-discovery app consuming a live third-party API, implementing search, filtering, and sorting with React hooks and reusable UI components.

LEADERSHIP EXPERIENCE

Head of Media

ElCoder — Alexandria, Egypt

- Led the Media department at ElCoder, directing event coverage, social media strategy, visual branding, and promotional content for workshops and student activities.
- Coordinated photo and video documentation, content calendars, and campaign assets, strengthening audience engagement and the organization's public presence.

EDUCATION

Bachelor's Degree in Computers and Data Science — Artificial Intelligence Department

Alexandria University — Graduated 2026

Relevant Coursework: Full Stack Web Development, Machine Learning, Natural Language Processing, Pattern Recognition, Databases, Cloud Computing, Neural Networks, Operations Research, Embedded Systems, Internet of Things, Modern Control Systems
