PROFESSIONAL SUMMARY

Full Stack Developer building responsive interfaces and backend services with TypeScript, React, Next.js, NestJS, FastAPI, and MongoDB. Develops user workflows, integrates APIs, and implements authentication and data access controls. Project work includes MindGuard, a graduation project for patient and doctor support, alongside education SaaS, event management, and commerce applications.

CORE SKILLS

Languages: TypeScript, JavaScript, Python

Frontend: Next.js, React, Tailwind CSS, HTML, CSS, responsive design, accessibility

Backend and APIs: Node.js, NestJS, FastAPI, Express.js, REST APIs, Socket.IO, Firebase Cloud Messaging

Databases and Infrastructure: SQL, MongoDB, Mongoose, MySQL, Redis, BullMQ, Docker, Vercel

Security: Authentication, authorization, JWT, RBAC, OTP, Argon2id, bcrypt, Helmet, CORS, rate limiting

Testing and Diagnostics: Jest, Postman, unit and integration testing, Zod, class-validator, audit logging

Automation: n8n, custom GPTs, LLM APIs, prompt design, workflow integration

Collaboration: Git, GitHub, code review, Agile workflows, technical communication, mentoring

PROFESSIONAL EXPERIENCE

Freelance AI and Full Stack Developer

2025 - Present

Self-Employed | Remote

- Built education management workflows, connecting responsive interfaces to backend services, database operations, and form validation.
- Developed role-specific SaaS workspaces with server-side permissions, tenant ownership, and subscription checks to control access to features and data.
- Implemented scheduling, student records, attendance, payment tracking, and support features, with reusable components for recurring application workflows.

Full-Stack Web Development Trainee

Jun 2026 - Aug 2026

Infolith | Remote

- Completed structured full-stack projects and practical assignments, applying web development concepts through the Infolith training portfolio.

Coding Instructor

Feb 2025 - Mar 2026

O-Academy | Remote

- Taught live, project-based lessons in Python, AI foundations, Scratch, and application logic to U.S.-based school-age students.
- Adapted technical concepts into accessible exercises and mentored students with different levels of experience.

Full Stack Developer Intern

Sep 2025 - Nov 2025

MAIM Digital Solutions | Alexandria, Egypt

- Built MongoDB data models, Node.js and Express REST APIs, and responsive React interfaces during the MAIM Web Summer Training program.
- Integrated APIs, resolved defects, and developed reusable components. Reviewed code and contributed pull requests within an Agile Git workflow.

AI and Automation Engineer

Apr 2025 - Sep 2025

Armstrong | Alexandria, Egypt

- Automated educational content workflows for the Digital Egypt Cubs Initiative using n8n, custom GPTs, LLM APIs, and open-source models.
- Translated educational requirements into reusable prompts and orchestration steps, validated outputs, and troubleshoot integrations.

SELECTED PROJECTS

MindGuard | Graduation Project in Mental Health Support

TypeScript, Next.js, Tailwind CSS, NestJS, FastAPI, MongoDB, Socket.IO

- Built responsive patient dashboards with mood check-ins, calendar history, analytics, guided breathing, journaling, and sleep logs. Added condition-based doctor discovery and appointment booking.
- Developed doctor dashboards for patient search, severity filtering, monitoring views, and session scheduling, editing, and review notes, using reusable components and light/dark themes.
- Connected interfaces to NestJS application APIs and FastAPI-powered AI functionality through the backend. Integrated NOVA chat with Socket.IO streaming, token-based API calls, data normalization, and retryable errors.

EduCore | Education Management SaaS

TypeScript, Next.js, NestJS, MongoDB, Redis

- Built workspaces for administrators, centers, teachers, and assistants, with room scheduling, student groups, attendance, payment records, and private support conversations.
- Connected application features to a NestJS backend with server-side role permissions, tenant isolation, and subscription checks. Used Redis locks and MongoDB transactions to coordinate data changes.

EventX Studio | Event and Ticketing Platform

React, Express.js, MongoDB, Vercel

- Built administrator interfaces for event creation and management, alongside attendee workflows for ticketing, booking, and QR check-in.
- Connected the React frontend to Express APIs and MongoDB, added sales dashboards and analytics, and deployed the application on Vercel.

E-Commerce Backend | Commerce Services

NestJS, MongoDB, JWT, Socket.IO, Docker

- Built a modular backend for carts, orders, payment-related operations, and uploads, with JWT authentication and role-based permissions.
- Added realtime functionality through Socket.IO, GraphQL health checks, and Docker support for running the service.

Social Media API | Social Application Services

TypeScript, Express.js, Socket.IO, Firebase Cloud Messaging

- Developed REST endpoints for social application features with API security controls and realtime communication through Socket.IO.
- Integrated Firebase Cloud Messaging notifications and implemented time-limited stories and cascading deletion of related records.

EDUCATION

Bachelor's Degree in Computers and Data Science

2026

Alexandria University

Relevant Coursework: Full-Stack Web Development, Database Systems, Cloud Computing, Software Engineering

ADDITIONAL TRAINING AND HONORS

Route Academy Full-Stack Web Development Diploma

Top Achiever | Jul 2026
